

The listed charge is specific to the service you choose and may not include additional services needed as part of your visit. For example, the price for a surgery does not include additional testing, supplies, pharmacy or other services that may be done as part of that procedure. Your total out-of-pocket cost depends on many factors, such as your specific benefit and coverage information, as well as the specific services you receive and your available provider network. If you opt to enter your health plan benefit information this tool will estimate the out of pocket cost share using the information you provide. Your final out-of-pocket cost may be influenced by many other factors such as the mix of services, your deductible, past performed services and the claims already processed related to your care or your family's care. Please check with your insurance company or your health benefits office if you need help understanding your benefits for the service selected.

Hospital charges

Your bill from Kearney Regional Medical Center are for facility charges, including but not limited to: daily room rate, nursing care, equipment and supplies, surgical services, pharmaceuticals, x-rays, labs and therapeutic services. These services will vary depending on your medical condition and what your doctor determines is necessary for your care.

Physician charges

Many physicians are independent providers, not hospital employees. Professional fees charged by these physicians will be billed separately and will not be included in your bill for hospital services. Physicians from whom you may receive a separate bill include, but are not limited to: Primary-care physicians, specialty-care physicians, consultants, pathologists, radiologists, anesthesiologists, cardiologists, and oncologists.
